- Hindi
- English

### PROFILE

Passionate cross-platform developer with 2 years of experience in building responsive and high-performance mobile & web apps using Flutter, React JS, and React Native. Skilled in UI/UX design, clean architecture, and collaborative development. Always eager to learn, grow, and deliver meaningful software solutions.

### OBJECTIVE - 2YEARS

My objective is to become an expert full-stack cross-platform developer, lead international-level projects, build scalable apps and products, and eventually launch successful businesses that make an impact globally.

### WORK EXPERIENCE

#### StackApp Infotech [🔗](#)

AUG - 2023 - AUG - 2024

Flutter Developer

- Developing cross-platform mobile applications using Flutter.
- Collaborating with designers and backend developers to create seamless user experiences.
- Implementing responsive UIs and ensuring app functionality across multiple devices.
- Conducting thorough testing and debugging to optimize app performance.
- Managing state using Getx, Provider, and other state management tools.

#### Matrix Software Solutions [🔗](#)

SEP - 2024 - PRESENT

Flutter, React JS & Native Developer,  
UI/UX Designer

- Developing and maintaining cross-platform applications using Flutter, React JS, and React Native.
- Designing responsive and user-friendly UI/UX using Figma and Frame tools.
- Leading solo projects from UI wireframing to deployment and client delivery.
- Collaborating with a small agile team for backend integration using Firebase, MongoDB, and REST APIs.
- Building reusable components and managing clean code architecture with state management tools (GetX, Provider).
- Participating in code reviews, project planning, and version control using Git & GitHub best practices.
- Learning and implementing industry best practices to improve development workflow and performance.
